**HEALTH OFFICIALS ISSUE RABIES ALERT-2<sup>ND</sup> FOX TEST POSITIVE**

**[Walton County]** – The Florida Department of Health in Walton County (DOH-Walton) issued a rabies alert for the Freeport area. This is in response to a fox that tested positive on May 31, 2018. A second fox has tested positive on June 12, 2018.

All residents and visitors in Walton County should be aware that rabies is present in the wild animal population and domestic animals are at risk if not vaccinated. The public is asked to maintain a heightened awareness that rabies is active in Walton County. Alerts are designed to increase awareness to the public. Please be aware that rabies activities can also occur outside the alert area.

This rabies alert is for 60 days. The center of the rabies alert is east of Freeport and includes the following boundaries in Walton County:

- Windswept Dunes Subdivision
- JW Hollington Road area

An animal with rabies could infect domestic animals that have not been vaccinated against rabies. All domestic animals should be vaccinated against rabies and all wildlife contact should be avoided, particularly raccoons, bats, foxes, skunks, otters, bobcats, and coyotes. Rabies is a disease of the nervous system and is fatal to warm blooded animals and humans. The only treatment for human exposure to rabies is rabies specific immune globulin and rabies immunization. Appropriate treatment started soon after the exposure will protect an exposed person from the disease.

Residents and visitors are advised to take the following precautions:

- Keep rabies vaccinations up to date for all pets and at-risk livestock.
- Do not allow your pets to run free. Follow leash laws by keeping pets and livestock secured on your property. If your pet or livestock are bitten by a wild animal, seek veterinary assistance for the animal immediately and contact Walton Animal Services at 850-892-8682.
- Support animal control in efforts to reduce feral and stray animal populations.
- Spay or neuter your pets to help reduce the number of unwanted pets that may not be properly cared for or regularly vaccinated.
- **Do not** handle, feed, or unintentionally attract wild animals with outdoor food sources such as uncovered trash or litter.
- **Never** adopt wild animals or bring them into your home.
- Teach children **never** to handle unfamiliar animals, wild or domestic, even if they appear friendly.
- Prevent bats from entering living quarters or occupied spaces in homes, churches, schools, and other similar areas, where they might come in contact with people and pets.
